

Career Transition Roadmap

Mahesh Kumar

Technical Trainer to **Software Developer** [cite: 144, 145, 147]

🎯 Objective

Transition from Technical Trainer to Software Developer within 12 months while working full-time[cite: 148]. Strategy focuses on mastering DSA and the MERN stack[cite: 149]. Long-term target is to scale from 4 LPA to 20 LPA within 5 years[cite: 150].

📅 12-Month Learning Phases

Phase 1: Foundations (Months 1-3)

DSA: Complexity, Arrays, Strings, Linked Lists, Stacks, Queues[cite: 155, 156].
JS: Closures, Promises, Async-Await, Event Loop[cite: 157].
Target: Solve 100+ DSA problems[cite: 158].

Phase 2: MERN Mastery (Months 4-6)

Frontend: Hooks, Context API, Performance Optimization[cite: 164, 165].
Backend: Middleware, MVC Architecture, API Security[cite: 166].
DB: Aggregation Pipelines, Indexing, Modeling[cite: 167].

Phase 3: Scaling (Months 7-9)

Backend: Redis Caching, Rate Limiting, Background Jobs[cite: 159, 160].
DevOps: Docker, CI-CD Pipelines, Cloud Deployment[cite: 161].

Phase 4: Design and AI (Months 10-12)

System Design: Load Balancing, Microservices, Caching[cite: 168, 169].
AI: OpenAI API, AI-powered Web Apps, Chatbots[cite: 170].

📅 Weekly Study Timetable

Day	Focus Area
Monday	DSA Practice, Algorithm Review, Complexity Analysis [cite: 163]
Tuesday	MERN Learning, Project Development, GitHub Documentation [cite: 163]
Wednesday	Medium-Level DSA, Pattern Recognition, Weekly Revision [cite: 163]
Thursday	Backend Practice, API Design, System Design Reading [cite: 163]
Friday	Extended Project Development (2 hrs), Deployment Practice [cite: 163]
Saturday	Advanced Topics (AI or System Design), Code Refactoring [cite: 163]
Sunday	Weekly Planning, Project Improvement, Revision [cite: 163]

🔗 Key Industry Projects

- **AI Resume Analyzer:** OpenAI API, React, Node.js. Features skill analysis[cite: 171, 172].
- **Real-Time Chat App:** Socket.io, MERN, JWT. Features live messaging[cite: 173].
- **Task Management SaaS:** Kanban board with team collaboration features[cite: 174].
- **LMS Platform:** Progress tracking, instructor panels, and payment integration[cite: 175].

📈 5-Year Salary Growth Projection

Year	Role	Focus	Salary
Year 1	Technical Trainer	DSA + MERN	4 LPA [cite: 177]
Year 2	Full Stack Developer	Production Projects	6-8 LPA [cite: 177]
Year 3	Mid-Level Developer	Backend Engineering	10-12 LPA [cite: 177]
Year 4	Senior Developer	Scalable Architecture	14-16 LPA [cite: 177]
Year 5	AI Developer	System Design Expertise	18-20 LPA [cite: 177]

Final Target: Solve 250+ DSA problems and maintain active GitHub presence[cite: 178].
